

Men's Gateway Residence

Men's Gateway Housing

The Gateway Facility in Elyria is a 24-hour supported residential facility operated by The Nord Center and can house up to 10 adult men who have been diagnosed with severe and persistent mental illness along with a concurrent substance use disorder.

Residents may live in the Center's 10 efficiency apartments for up to a year while developing independent living skills. Recovering males may participate in intensive counseling, group therapy, abstinence-based treatment and employment. By being supportive of each other and encouraging of their mutual goals, each client has the opportunity of sharing his own recovery process in a manner that may benefit another resident of Gateway.

Referrals are made by the Community Support Team.
